ANMD-MRS12-115 · Digital Health & Clinical AI Technologies

A Global Sustainability Due Diligence & Market Research Study

History 2020–2024 · Base Year 2025 · Forecast 2025–2032 · Outlooks 2035 / 2040 / 2050 · Currency US\$

## WHY THIS REPORT

Hospital analytics platforms turn clinical, operational and financial data into actionable intelligence — driving capacity management, quality improvement, revenue-cycle optimisation and command-center operations atop EHR and enterprise data. This decision-grade study sizes the global market three ways — value, deployments and monitored beds/encounters — across analytics domain, deployment and application, across seven regions and four scenarios to 2032, with outlooks to 2050.

## SUSTAINABILITY & SDG IMPACT — THE ANMD LENS

The sustainability case here is systemic and operational. Hospital analytics can improve efficiency, access and care quality, while raising data-governance and equity questions.

Mapped Sustainable Development Goals:

<b>SDG 3</b> Good Health & Well-Being	<b>SDG 9</b> Industry, Innovation & Infrastructure	<b>SDG 10</b> Reduced Inequalities	<b>SDG 12</b> Responsible Consumption	<b>SDG 17</b> Partnerships for the Goals
--	---	---------------------------------------	--	---

Measurable sustainability outcomes assessed:

- Shorter length-of-stay and better throughput
- Captured revenue and managed cost
- Data-driven clinical and operational decisions
- Data privacy, allocation fairness and decision accountability as material risks

**Framework alignment:** Double materiality mapped to GRI, SASB, ISSB, TCFD, TNFD, CSRD and the EU Taxonomy, with greenwashing and SDG-washing screens applied throughout.

## REPORT COVERAGE

**Geographic scope:** North America, Europe, Asia Pacific, Latin America, Africa, Middle East and Rest of World — with named country intelligence. North America leads enterprise adoption; Europe scales on national systems; Asia Pacific grows fastest; other regions assessed on their own merits.

## MARKET OVERVIEW

**From retrospective reporting to predictive command-center — where real-time data anticipates capacity and risk.**

Hospital analytics is moving from retrospective reporting to real-time, predictive command-center operations. Demand is driven by margin pressure, capacity constraints and value-based-care reporting across North America, Europe and Asia Pacific. The market is read three ways — value, deployments and monitored beds/encounters — and forecast under four scenarios, each region reported separately.

- **North America leads enterprise adoption** — United States, on EHR-vendor analytics, command-center models and value-based-care reporting
- **Europe scales on national systems** — the UK, Germany and the Nordics, where health-system efficiency and quality reporting drive uptake
- **Asia Pacific grows fastest** — China, India, Japan and Australia, combining hospital digitalisation with large-scale data investment
- **Predictive command-center is the differentiator** — real-time capacity, flow and risk prediction shifts hospitals from reactive to anticipatory operations

## REGIONAL OUTLOOK

Across seven reporting regions, the report separates leading markets from high-growth and emerging ones — each profiled in full rather than aggregated into Rest of World.

Region	Stage	Lead Markets & Drivers
North America	Enterprise leader	United States, Canada — reimbursement, FDA pathway, enterprise EHR scale
Europe	National-system scale	Germany, France, UK, Netherlands — EU MDR/AI Act, national health systems
Asia Pacific	Fastest growth	China, Japan, India, South Korea, Australia — digital-health investment
Middle East	Strategy-led	Saudi Arabia, UAE, Israel — digital-health strategy, sovereign investment
Latin America	Emerging	Brazil, Chile, Mexico — telehealth growth, access gaps
Africa	Frontier	South Africa, Egypt, Kenya — access expansion, mobile health, blended finance

## WHY ANMD — THE DIFFERENCE

---

*Most market studies stop at units and revenue. This report is built as a sustainability due diligence instrument — fusing market sizing with ESG, SDG, climate, water and natural-capital intelligence and a decision-ready bankability view in a single architecture.*

- **Triangulated sizing** — every market read three ways so value, volume and the physical-unit views reconcile rather than conflict.
- **Region-honest forecasting** — Latin America, Africa and the Middle East reported in full, never hidden inside Rest of World, every forecast resolved to the 2025 base year.
- **Integrated evidence base** — company, patent and project databases linked to the analysis, with published-filing patents and FTO treated as an indicator, not a legal conclusion.
- **No-fabrication discipline** — every estimate carries a data-confidence rating and disclosed sources; gaps are flagged for further diligence, never filled with invented numbers.
- **Anti-greenwashing rigour** — SDG-washing and greenwashing screens plus claim-substantiation checks built into the ESG and project analysis.
- **Decision-first structure** — 9 Parts and 53 Chapters culminating in stakeholder playbooks and a clear, conditional investment view.
