ANMD-MRS5-044 · Sustainable Packaging

A Global Sustainability Due Diligence & Market Research Study

WHY THIS REPORT

Recyclable barrier pouches solve flexible packaging's recycling problem, turning unrecyclable multi-material laminates into mono-material, recycle-ready structures that keep barrier performance. This decision-grade study sizes the global market three ways — value, units and volume — across pouch type, structure and application, across seven regions and four scenarios to 2032, with outlooks to 2050.

SUSTAINABILITY & SDG IMPACT — THE ANMD LENS

Sustainability is this report's backbone, not an afterthought. Beyond function, recyclable barrier pouches deliver measurable recycling-stream compatibility, retained barrier and lower packaging waste, while design-for-recycling and mono-materials strengthen the circular-economy story.

Mapped Sustainable Development Goals:

SDG 12 Responsible Consumption	SDG 13 Climate Action	SDG 14 Life Below Water
--	---------------------------------	-----------------------------------

Measurable sustainability outcomes assessed:

- Recycling-stream compatibility and retained barrier
- Lower flexible-packaging waste
- Design-for-recycling mono-material structures
- Material sourcing, recyclability infrastructure and supply-chain ESG as material risks

Framework alignment: Double materiality mapped to GRI, SASB, ISSB, TCFD, TNFD, CSRD and the EU Taxonomy, with greenwashing and SDG-washing screens applied throughout.

REPORT COVERAGE

Geographic scope: North America, Europe, Asia Pacific, Latin America, Africa, Middle East and Rest of World — with named country intelligence. Europe is the policy leader (Germany, France, Italy) on packaging regulation and compostability standards; North America is the value leader (United States, Canada) on brand commitments; Asia Pacific is the scale engine; other regions assessed on their own merits.

MARKET OVERVIEW

From early adoption to mainstream scale — where flexible packaging goes mono-material, recycle-ready and barrier-retaining.

The recyclable barrier pouches market is moving from early adoption to mainstream commercial scale. Demand is driven by circularity and design-for-recycling pressure converging with brand and regulatory commitments, supported by strong momentum across Europe, North America and Asia Pacific. The market is read three ways — value, units and volume — and forecast under four scenarios, each region reported separately.

- **Europe is the policy leader** — Germany, France and Italy, on recyclability rules and EPR
- **North America is the value leader** — United States and Canada, on brand commitments and retail demand
- **Asia Pacific is the scale engine** — China, Japan and India, on conversion capacity
- **Design-for-recycling is the differentiator** — mono-material structures plus retained barrier performance

REGIONAL OUTLOOK

Across seven reporting regions, the report separates early commercialisation leaders from high-growth and emerging markets — each profiled in full rather than aggregated into Rest of World.

Region	Stage	Lead Markets & Drivers

WHY ANMD — THE DIFFERENCE

Most market studies stop at units and revenue. This report is built as a sustainability due diligence instrument — fusing market sizing with ESG, SDG, climate, water and natural-capital intelligence and a decision-ready bankability verdict in a single architecture.

- **Triangulated sizing** — every market read three ways so value, volume and area views reconcile rather than conflict.
- **Region-honest forecasting** — Latin America, Africa and the Middle East reported in full, never hidden inside Rest of World, every forecast resolved to the 2025 base year.
- **Integrated evidence base** — company, patent and project databases linked to the analysis, with published-filing patents and FTO treated as an indicator, not a legal conclusion.
- **No-fabrication discipline** — every estimate carries a data-confidence rating and disclosed sources; gaps are flagged for further diligence, never filled with invented numbers.
- **Anti-greenwashing rigour** — SDG-washing and greenwashing screens plus claim-substantiation checks built into the ESG and project analysis.
- **Decision-first structure** — 9 Parts and 53 Chapters culminating in stakeholder playbooks and a clear Go / No-Go / Conditional-Go investment verdict.
