WHY THIS REPORT

Remote patient monitoring (RPM) extends clinical oversight beyond the hospital — using connected devices and platforms to track vital signs, chronic-disease markers and post-acute recovery in the home, spanning chronic-disease RPM, cardiac monitoring, hospital-at-home and multi-parameter hubs. This decision-grade study sizes the global market three ways — value, enrolled patients and monitored encounters — across monitoring category, connectivity and application, across seven regions and four scenarios to 2032, with outlooks to 2050.

SUSTAINABILITY & SDG IMPACT — THE ANMD LENS

The sustainability case here is social and systemic. RPM can expand access, reduce readmissions and shift care to lower-cost settings, while raising equity and data-governance questions.

Mapped Sustainable Development Goals:

SDG 3 Good Health & Well-Being	SDG 9 Industry, Innovation & Infrastructure	SDG 10 Reduced Inequalities	SDG 12 Responsible Consumption	SDG 17 Partnerships for the Goals
--	---	---------------------------------------	--	---

Measurable sustainability outcomes assessed:

- Fewer readmissions and earlier intervention
- Lower cost of care and expanded capacity
- Care shifted to lower-cost settings
- Digital-divide equity, data security and clinical accountability as material risks

Framework alignment: Double materiality mapped to GRI, SASB, ISSB, TCFD, TNFD, CSRD and the EU Taxonomy, with greenwashing and SDG-washing screens applied throughout.

REPORT COVERAGE

Geographic scope: North America, Europe, Asia Pacific, Latin America, Africa, Middle East and Rest of World — with named country intelligence. North America leads reimbursement; Europe scales on chronic care; Asia Pacific grows fastest; other regions assessed on their own merits.

MARKET OVERVIEW

From pilot to reimbursed standard of care — where hospital-at-home reshapes capacity and cost.

Remote patient monitoring is moving from pilot to reimbursed standard of care. Demand is driven by ageing populations, chronic-disease burden and value-based-care and hospital-at-home models across North America, Europe and Asia Pacific. The market is read three ways — value, enrolled patients and monitored encounters — and forecast under four scenarios, each region reported separately.

- **North America leads reimbursement** — United States and Canada, on CMS RPM/RTM codes and value-based care
- **Europe scales on chronic care** — Germany, France, the UK and the Netherlands, where national systems integrate remote monitoring
- **Asia Pacific grows fastest** — China, Japan, India and Australia, combining ageing demographics with digital-health investment
- **Hospital-at-home is the differentiator** — acute-level remote care shifts inpatient volume to the home, reshaping capacity and cost

REGIONAL OUTLOOK

Across seven reporting regions, the report separates leading markets from high-growth and emerging ones — each profiled in full rather than aggregated into Rest of World.

Region	Stage	Lead Markets & Drivers
North America	Reimbursement leader	United States, Canada — RPM/RTM codes, value-based care
Europe	Chronic-care scale	Germany, France, UK, Netherlands — national health systems
Asia Pacific	Fastest growth	China, Japan, India, South Korea, Australia — digital-health investment
Middle East	Strategy-led	Saudi Arabia, UAE, Israel — digital-health strategy, sovereign investment
Latin America	Emerging	Brazil, Chile, Mexico — telehealth growth, access gaps
Africa	Frontier	South Africa, Egypt, Kenya — access expansion, mobile health, blended finance

WHY ANMD — THE DIFFERENCE

Most market studies stop at units and revenue. This report is built as a sustainability due diligence instrument — fusing market sizing with ESG, SDG, climate, water and natural-capital intelligence and a decision-ready bankability view in a single architecture.

- **Triangulated sizing** — every market read three ways so value, volume and the physical-unit views reconcile rather than conflict.
- **Region-honest forecasting** — Latin America, Africa and the Middle East reported in full, never hidden inside Rest of World, every forecast resolved to the 2025 base year.
- **Integrated evidence base** — company, patent and project databases linked to the analysis, with published-filing patents and FTO treated as an indicator, not a legal conclusion.
- **No-fabrication discipline** — every estimate carries a data-confidence rating and disclosed sources; gaps are flagged for further diligence, never filled with invented numbers.
- **Anti-greenwashing rigour** — SDG-washing and greenwashing screens plus claim-substantiation checks built into the ESG and project analysis.
- **Decision-first structure** — 9 Parts and 53 Chapters culminating in stakeholder playbooks and a clear, conditional investment view.
